

EEL4930/EEL5840 – Plan for the rest of the semester

11/12/2016

This is a plan for the rest of the semester. The topics to be addressed are neural networks, backpropagation, optimization, SVM and Deep Learning. In addition to project 2, there are two more assignments to be released (HW6 and project 3). The second exam, covering the second part of the material covered, is going to be held December 1 in class. Further details about the prospective plan are going to be addressed this Tuesday in class.

Date	Hours	Topic	Assignment
November 10	2	Neural Networks	Project 2
November 15	1	Neural Networks	
November 17	2	Backpropagation	HW6
November 22	1	Optimization	Project 3
November 24	2	Thanksgiving	Thanksgiving
November 29	1	Optimization	
December 1	2	EXAM 2	EXAM 2
December 6	1	SVM, Deep Learning	

Assignments:

- **Project 2** – Assigned November 10 – **Due:** November 28
- **HW6** – To be released November 17 – **Due:** November 24
- **Project 3** – To be released November 22 – **Due:** December 10
- **Exam 2** – In class – December 1
